

## Clinical Learning Guide

### Ambu bag ventilation

STEP/TASK	AP	IP	NP
<b>Inspecting the victim:</b>			
<b>Bag-valve mask ventilation</b>			
1. Choose an appropriately sized bag-valve mask			
2. Attach the bag-valve mask to an oxygen supply if present.			
3. Hold the mask over the face with your hand. Place your thumb over the mask near the nose and support the jaw with the middle and ring fingers, ensuring a tight seal (C&E)			
4. Use your free hand to compress the bag			
5. Ventilate with the bag at a rate of 10 compression per minute			
6. Look for a rise in the chest.			

Bag-valve mask ventilation

AP = Adequately Performed  
 IP = Inadequately Performed  
 NP = Not Performed
